

Mr. & Mrs. Richard Borders  
3556 El Ferrol Court  
Bridgeton, Missouri 63044

Sept 5, 2002

Attention: Audrey Berry,

I want to address  
my concern for the  
Weldon Spring radioactive  
contamination clean up.  
We live close to the area and  
are very disappointed in the  
sale of rock mountain that  
is suppose to solve the problem.  
I think it is a joke! what  
about our water.

G-1

Response G-1: The decision to construct an on-site disposal facility was reached through a public process and the affected communities in St. Charles County reached a consensus opinion to allow it. St. Louis County and St. Charles County public drinking water is safe.

G-2

If we cannot control  
the radioactive by products we  
should stop producing it

Response G-2: Comment noted.
